Organization

Yes. Respiratory viruses can be passed by shaking hands and touching your eyes, nose and mouth.

Greet people with a wave, a nod or a bow instead.

Should I avoid shaking hands because of the new coronavirus?

World Health  
Organization

#Coronavirus #COVID19

9 March 2020

To prevent COVID-19 it is  
safest to avoid physical  
contact when greeting.  
Safe greetings include a  
wave, a nod, or a bow.

How should I greet  
another person to avoid  
catching the new  
coronavirus?

**No. Regularly washing your bare hands offers more protection against catching COVID-19 than wearing rubber gloves.**

You can still pick up COVID-19 contamination on rubber gloves. If you then touch your face, the contamination goes from your glove to your face and can infect you.

**Is wearing rubber gloves while out in public effective in preventing the new coronavirus infection?**
